Profile Summary

I'm a Software Engineering graduate who enjoys building web applications using both traditional stacks (Java, Bootstrap) and modern libraries like React.js. I'm also exploring AI to bring smarter, more innovative touches to my projects. I've developed academic systems like a Thesis Management Portal focusing on clean code and user-friendly interfaces. Now I'm looking for my first professional Software Engineer role where I can contribute, build meaningful products, and keep learning every day.

Professional Skill

Programming Language

- **Java** – Knowledge of object-oriented programming and basic application development.
- **C++** – Familiar with algorithms, data structures, and problem-solving techniques.
- **JavaScript** – Applied in web development projects for interactive front-end features.
- **Python** – Used for scripting, automation, and basic programming projects.

Web Development:

- **HTML, CSS** – Built responsive web pages and layouts.
- **Bootstrap , React.js** – Designed modern UI components for projects efficiently.

Database & Tools:

- **SQL** – Performed basic database creation, queries, and data management.
- **Visual Studio Code** – Used as the primary code editor for programming and web projects.
- **MS Office** (Word, Excel, PowerPoint) – Document creation, spreadsheets, and presentations.

Other Skills:

- **Visual Programming** – Developed visual logic applications for academic exercises.
- **Project Management (Academic Knowledge)** – Planned and executed projects using academic concepts.
- **Digital Entrepreneurship** – Applied entrepreneurial concepts in digital projects and coursework.

Education

BS Software Engineering

2021 – 2026

PMAS-Arid Agricultural University, Rawalpindi

Project Experience

Thesis Management System – Academic Project for MS Students

Technologies: React.js, HTML, CSS, Bootstrap, SQL

- Developed a dynamic front-end interface using React.js to create a seamless and interactive user experience for MS students and supervisors.
- Integrated React components with a backend SQL database to manage thesis submissions, track student progress, and handle task assignments.
- Built responsive UI layouts using Bootstrap and CSS, ensuring accessibility across all devices.
- Streamlined supervisor-student communication through an organized task management module, reducing manual follow-ups.

Interests

- Web Development
- Programming Challenges
- Digital Projects
- Tech Innovation

Soft Skills

- Problem Solving
- Team Work
- Time Management
- Willingness to Learn
